PROFESSIONAL SUMMARY

Detail-oriented and results-driven Aspiring Data Analyst with hands-on expertise in Python, SQL, Power BI, Excel, and Machine Learning. Proven track record in data cleaning, exploratory data analysis (EDA), ETL processing, interactive dashboard development, and predictive analytics. Adept at translating raw, unstructured data into compelling visual stories and actionable business intelligence. Passionate about leveraging data-driven insights and modern AI tools to solve real-world technical problems.

TECHNICAL SKILLS

Languages & Querying:

Python SQL DAX

Libraries & Frameworks:

Pandas NumPy Matplotlib Seaborn Scikit-Learn

Tools & Platforms:

Power BI MySQL SQL Server Microsoft Excel GitHub Google Colab

Data Analysis & BI:

Data Cleaning Exploratory Data Analysis (EDA) ETL Pipelines Data Modeling
KPI Dashboards

AI & Productivity:

ChatGPT AI-Assisted Workflow & Analytics

TECHNICAL PROJECTS

Movie Recommendation System

Python | Scikit-Learn | Pandas | NumPy

- Engineered a high-accuracy content-based recommendation system to provide personalized movie suggestions.
- Preprocessed large datasets, performed feature extraction, and applied Cosine Similarity metric to calculate item relevance.
- Optimized engine throughput to generate dynamic user recommendations in real-time.

HR Analytics & Decision Dashboard

Power BI | DAX | SQL | Excel

- Designed an interactive Power BI dashboard tracking attrition rates, employee demographics, and performance KPIs.
- Utilized DAX to construct customized calculated measures and dynamic time-intelligence calculations.
- Delivered executive-ready BI reports to assist HR management in identifying key workforce retention strategies.

Healthcare Data Analysis & Diagnostic Pipeline

Python | EDA | Matplotlib | Seaborn

- Executed in-depth exploratory data analysis (EDA) across clinical datasets to uncover diagnostic trends and outliers.
- Constructed data cleaning and imputation pipelines to handle missing values and improve overall data reliability.
- Visualized key patient health indicators to present actionable insights for operational improvement.

EDUCATION

Bachelor of Computer Applications (BCA)

Eklavya University, Damoh, MP

2023 – 2026 (Expected) | CGPA: 6.72 / 10 (Sem V)

Senior Secondary (12th Class) — CBSE

CBSE Board, Ajmer | 2021

Percentage: 61.8%

Secondary School (10th Class) — NBSE

NBSE Board, Kohima

Percentage: 58.16%

CERTIFICATIONS

Machine Learning & Data Science

Hands-on predictive modeling and data pipelines

Generative AI & AI-Assisted Workflows

Applied AI tools for efficient data analysis
